“A story about a time, about a place but above all, a story about Love... A man is walking down a cable to 300m to the Eiffel Tower. the breathless crowd piles up and whispers to each of his steps ... But ... Who is this man??

Paris, 1892, in the city of great artists and great inventions that amazed the world, a young star of the famous Cabaret Folies Bergere and a chimney sweep are about to meet, an encounter that will change their lives.”

Café de las Artes Teatro continues to promote new forms of storytelling, we investigate new languages, based on traditional artistic disciplines, giving them a new vision and fusing them. This piece for family audiences feeds theater, objects, dolls and puppets, music and shadows.

The Company

Café de las Artes Teatro is a company that creates and produces intimate and evocative performances arising from the fascination of its members to build imaginaries that break routines, and thus, find a deeper and more direct communication with the viewer.

Influenced by theater, circus, sensory language, objects, puppets, shadows, music... the members of the company research and seek their own path. A route that rotates between the fragile, the near, the seductive and what is not seen, but it feels and resonates.
